

Automechanika Debut for Labcraft

Labcraft will be exhibiting for the first time at this years Automechanika show in Frankfurt, Germany. Automechanika is the leading International trade fair for the Automotive Industry, with over 160,000 trade visitors it will put Labcraft in front of a global audience and Labcraft are out to impress.

Labcraft will be launching 3 new LED products at Automechanika, these will complement the current range but also add an element of diversification allowing Labcraft to offer the benefits of LED lighting to a wider audience. On display will be the latest generation of high power interior LED lighting side by side with the ultra bright fluorescent range. There will be a trailer simulation area where prospective customers will get the chance to see a range of lighting products in an environment similar to a real world situation.

LED lighting is becoming more and more popular within the automotive sector; unfortunately not all of it is fit for use within this environment and could put some users

off trying this new technology. At Labcraft all products are designed solely for this market and use only the highest quality component parts. Labcraft light also strives to designing lighting schemes that meet and exceed the health and safety guidelines for that country.

Labcraft continues to move with the technological advancement of all lighting types making sure the entire product range is consistently the brightest, the most efficient and the most durable for all markets within the automotive sector.

Labcraft representatives would be delighted to welcome you onto Stand A30 in Hall 3.1.

Automechanika is on from 16th to 21st of September 2008, for further information please visit <http://automechanika.messefrankfurt.com/frankfurt/en/home.html>
