

NEW APPLICATION **BANKSMAN** PROJECT

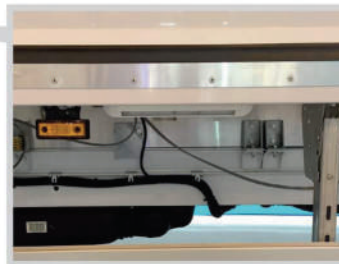

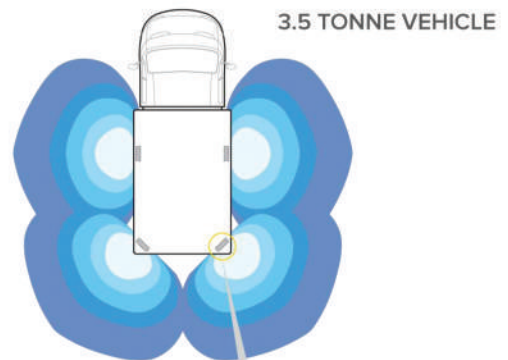

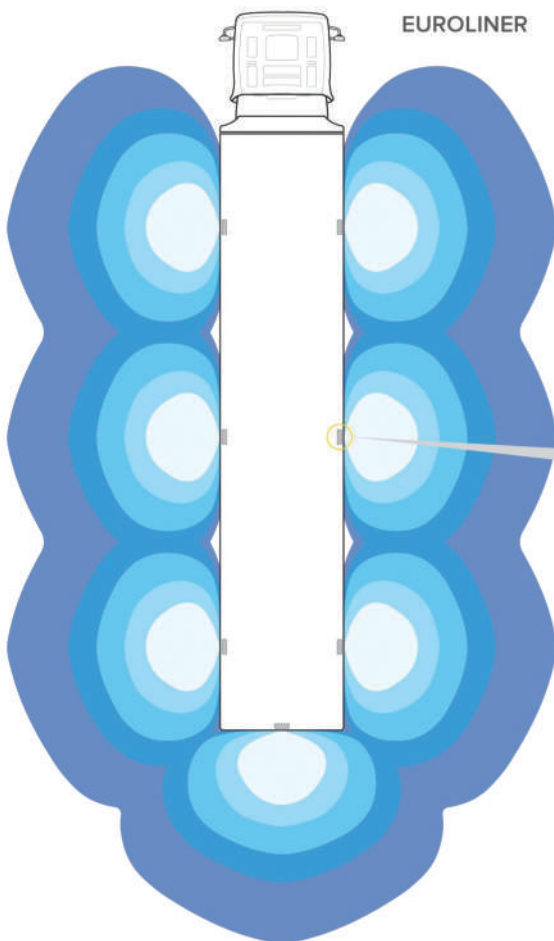

DESIGNED
FOR
COMMERCIAL
AND
EMERGENCY
VEHICLES

The Labcraft Banksman is a driver aid designed to deliver additional light to the sides and rear of commercial and emergency service vehicles. By significantly improving driver visibility it dramatically reduces the potential for damage to be caused to vehicle bodies when manoeuvring into poorly lit areas.

The Labcraft Banksman delivers light into areas that cannot be covered by traditional reversing lights.

This innovative solution can be fitted as standard to new vehicles or be retrofitted to an existing fleet.

With a range of options, Labcraft offer cost effective solutions for fleets of all sizes reducing:

- Expensive repair bills
- Time off the road
- Loss of earnings
- Insurance claims and premiums
