

SPRING 2015

Labcraft Becomes Brighter for 2015

Over the recent months our Technical Team have been working closely with global LED technology experts Cree to upgrade the Labcraft product range with the very latest LED devices.

Labcraft use Cree LED technology exclusively in their products and the close working relationship between us ensures we have advance access to the very latest developments in LED technology. This means that the entire 2015 Labcraft range is brighter, in some cases by up to 92%, and all at no extra cost to our customers!

Justin Stamp, Head of Sales, commented: "We are delighted to announce our second product upgrade in as many years. We continue to work hard to deliver innovative, well designed products backed by our market leading 10 year product warranty to meet the exacting requirements of our OE and Fleet customers. By designing, developing and manufacturing all of our LED products in-house at our UK facility, it ensures we can move quickly to implement the latest developments from our technology partner Cree and deliver the brightest, most efficient low voltage LED lighting solutions to the Commercial Vehicle sectors both in the UK and Europe."

Looking Ahead to the CV Show - Stand 3E72

Labcraft's Megalux Chosen by Doyles for Quality & Reliability

Doyles, the Leicester based Commercial Vehicle Body Builders, are the latest company to choose the Labcraft Megalux range for their LED interior lighting requirements.

Strategic Project Manager, Joseph Fieldstaff-Hughes, commented: "When it comes to components to complement our vehicles, Doyles demand the ultimate in performance at low power whilst achieving the highest standards aesthetically. We are delighted to have chosen Labcraft as our supplier of interior lighting solutions and are proud for our range of High Payload Commercial Bodies to have the Megalux LED with built in PIR fitted as standard. The IP66 rated light delivers a clear, white light ensuring optimum safe working areas and reducing health and safety risks."

We are delighted to be exhibiting at the CV Show again this year, the largest road transport event in the UK.

Meet the Labcraft team in HALL 3 STAND E72 and discover more about our products and how we can save your company £££'s.
