

AUGUST 2015

Labcraft's Flux LED Flat Panel chosen by James Alpe for latest project

James Alpe Vehicle Conversions, one of the UK's leading converters for Police, Public and Private Sector organisations, have chosen Labcraft LED lighting for their latest project, and have fitted the Flux LED Flat Panel for this particular application.

James Alpe were tasked with designing a complex 'laboratory vehicle' build for a company called Metrohm. The brief was for a modern, stream lined and clinical looking vehicle which would be used to show case the company's hi-tech testing equipment. The Labcraft Flux LED Flat Panel unit was selected by Alpe's project manager for 'ease of fitment, slim line appearance and a reliable and professional looking product'. Metrohm were highly delighted with the finished vehicle which is now in operation across the UK.

James Alpe have been in existence for 15 years and carry out bespoke and specialist conversions on all types of commercial vehicles, from a one off builds to complete fleets. Their supply chain is key to their conversion work and choosing the right product from the right manufacturer is an important consideration, especially when choosing electrical components. James Alpe also frequently choose the Labcraft SI8 Scenelite in many of the horse box refurbishments they carry out for different Police forces.

The SI8 is part of the Labcraft scene light range providing a choice of three bright, energy efficient lighting solutions with superior illumination to ensure optimum safe working areas and reducing health and safety risks. Labcraft has established itself as a leader in the market offering high quality products at affordable prices, supplying equipment that is especially designed and fit for purpose, manufactured to the highest specification utilising the latest in today's technology, and backed by the Labcraft 10 year warranty.

Labcraft launches the new Flux 250 LED Flat Panel

The latest new product from the Labcraft Design team is the Flux 250 which provides a compact lighting source without any compromise on light output.

At only 307mm in length and 11mm in depth, and complimenting the 570mm Flux 500 unit, this low profile surface mount unit uses the latest in Cree LED technology to create up to 1125 lumens and 138 lux @ 1 metre of clean white light.

The Flux is 100% dimmable allowing full control over the level of light required, and offers both trauma and night light options in a choice of red or blue LEDs. The acrylic LGP offers a unique patented anti-glare guide which disperses the light evenly avoiding any hotspots, and provides a cleaner and sharper field of light.

This versatile LED light can be fitted in a multitude of applications such as Emergency Vehicles, PSV, mobile units and Marine.

The Flux range is e-type approved, with CEN compliant units available, designed and manufactured in the UK and backed by the Labcraft 10 year warranty.
