

NEW APPLICATION **BANKSMAN** PROJECT

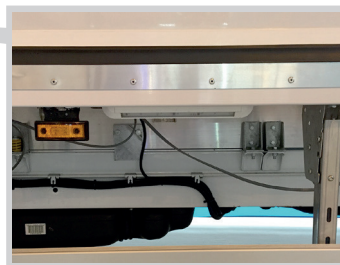

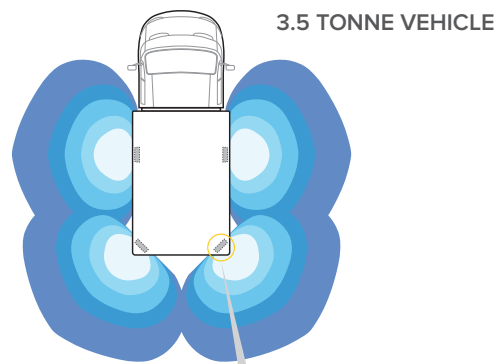

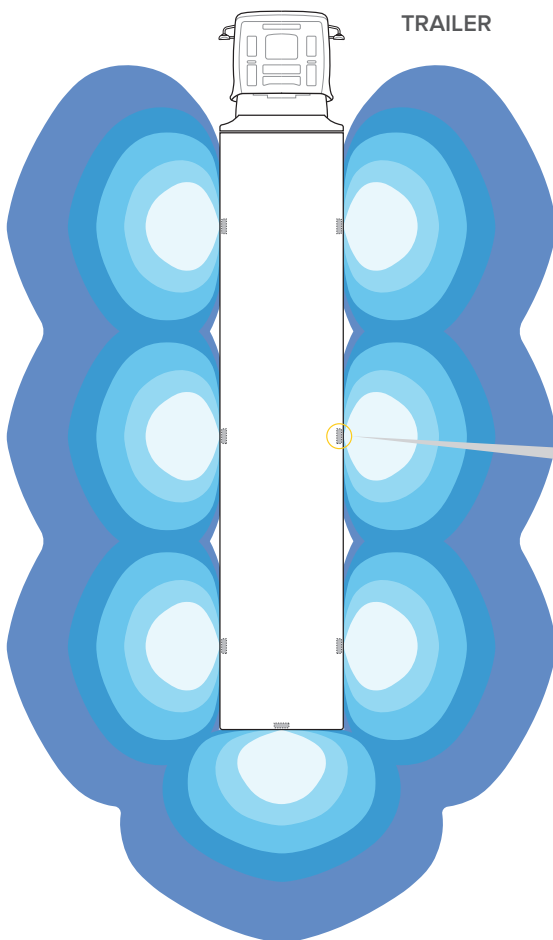

DESIGNED FOR
COMMERCIAL
AND
EMERGENCY
VEHICLES

The Labcraft Banksman is a driver aid designed to deliver additional light to the sides and rear of commercial and emergency service vehicles. By significantly improving driver visibility it dramatically reduces the potential for damage to be caused to vehicle bodies when manoeuvring into unlit areas.

The Labcraft Banksman delivers light into areas around the vehicle traditional reversing lights cannot cover.

This innovative solution can be fitted as standard to new vehicles or be retrofitted to an existing fleet.

With a range of options Labcraft offer cost effective solutions for fleets of all sizes reducing

- ⦿ Expensive repair bills
- ⦿ Time off the road
- ⦿ Loss of earnings
- ⦿ Insurance claims and premiums
